

# Get WSUS points

## Description

Gets a list of WSUS Points.

## Syntax

GetWSUSPoints() as ArrayList

## Parameters

None

## Return value

The function returns an array of WSUS points. Each element in the array is a joined line with the character defined with [Set splitter](#).

- point.ID
- point.Name
- point.GUID

## Example

### VBScript

```
Set oCMS = CreateObject("CapaInstaller.SDK")
Set aUnit = CreateObject("System.Collections.ArrayList")
Set aUnit = oCMS.GetWSUSPoints()
for each item in aUnit
    wscript.echo item
next
```
