

Get OS installation types

Description

Gets OS Installation Types.

Syntax

```
GetOSInstallationTypes(Byval OSPointID as Integer) as ArrayList
```

Parameters

OSPointID (Integer)

OS Point ID

Return value

The function returns an array of OS installation types. Each element in the array is a joined line with the character defined with [Set splitter](#).

- InstallType.ID
- InstallType.GUID
- InstallType.Type

Example

VBScript

```
Set oCMS = CreateObject("CapaInstaller.SDK")
Set aUnit = CreateObject("System.Collections.ArrayList")
Set aUnit = oCMS.GetOSInstallationTypes("1")
for each item in aUnit
    wscript.echo item
next
```
