

# Ini\_GetAllSections

## Description

Reads all section-headers

## Syntax

Ini\_GetAllSections(sFile, sSeperateChar, bReturnAsArray, bMustExist) As Boolean

## Parameters

*sFile (String)*

Filename

*sSeperateChar (String)*

Char between each section-header

*bReturnAsArray (Boolean)*

Section-list must be returned in array

*bMustExist (Boolean)*

File must exist

## Return value

If bReturnAsArray is true the list of section headers will be returned in gaValue otherwise the list will be returned in gsValue separated by sSeperateChar

## Example

### VBScript

```
If bStatus Then bStatus = Ini_GetAllSections("C:\CapaInstaller.ini", "|", True, True)
If bStatus Then
  For index = LBound(gaValue) To UBound(gaValue)
    bStatus = Job_WriteLog("Custom", "Index #" & index & ": " & gaValue(index), bStatus, True)
  Next
End If
```
