

Link Business Units to Security Group

Introduction

From this form it is possible to link/unlink Business Units to/from a security group. Units on the linked Business Units become visible to members of the profiles in the security group.

Step	Action
1	<p>Open security Management and right click on a security group. Click Link to Business Units.</p> 
2	Select Business Units from the left list and press add.
3	Click OK to commit the changes.
