

Create a new PXE menu group

Introduction The following is a description of how to create a PXE boot menu group.

Step	Action
1	Right click the PXE server and select Properties Boot Configuration....
2	Select menu group and press Add Menu to create new PXE boot menu group.
3	Fill in Menu group name and Comment.  <p>It is possible to restrict access to the Menu group by setting a password.</p> <p>It will be necessary to create one or more PXE boot menu items next. And create a link to this menu in an already existing Menu group.</p>
